

Handmade prints Limited edition collection: Exact count TBC but each are sold individually with option of adding original frames from exhibition.

Product Title

Shuka & Soil — Handmade Fine Art Exhibition Prints

Category

Photography Prints

Description

Handmade fine art photographic prints from the original *Shuka & Soil* exhibition. These are the same images displayed in the exhibition, produced as part of the final edit and printed at 16 × 12 inches. All photographs were shot entirely on film during two extended visits to Tanzania in 2023 and 2025, documenting Maasai communities and their relationship with land and wildlife across various regions of Arusha.

Each print was personally developed and printed by the artist in the darkroom. Prints can be purchased unframed, or with the original frames used in the exhibition for an additional cost.

Format & Specifications

Print Size: 16 × 12 inches (slightly larger than A3)

Paper: Fuji DPM - Matte fine art photographic paper

Edition: Limited edition

Process: Shot on film, hand-developed and printed in the darkroom

Framing: Unframed or original exhibition frame (additional cost)

Pricing & Shipping

Pricing varies by image and framing option.

UK and international shipping available; shipping calculated at checkout.

PHOTOGRAPHY BOOK: remaining stock 7 copies (will order more when they sell out)

Shuka & Soil — Photography Book

Category

Photography Books

Short Description

A hardback A4 photography book translating the 2025 *Shuka & Soil* exhibition into an intimate, tactile object, designed as a coffee table book to bring the exhibition experience into the home.

Long Description

Shuka & Soil is a hardback photography book bringing together work made during two extended visits to Tanzania in 2023 and 2025. The photographs were made across various regions of Arusha, Tanzania, while living and working closely with Maasai communities. The project grew out of time spent on the ground, observing daily life, understanding how the Maasai live with the land, and seeing how wildlife and human life exist alongside one another.

The project was shot entirely on film, encouraging a slower and more deliberate way of working that reflects the pace of life within the communities photographed. The work was also a way of

sharing and educating, offering insight into how life functions within these communities. The photographs touch on rituals, cultural norms, and everyday moments, showing a wide range of experiences, from the young to the elderly, those living closer to westernised society, and those continuing more nomadic ways of life.

Rather than focusing on spectacle, the images move between portraits, landscapes, and quieter moments, paying attention to clothing, texture, gesture, and the spaces where life unfolds naturally. Designed as a coffee table book, *Shuka & Soil* is meant to be picked up and lived with. For those who visited the exhibition, it offers a way to carry that experience home; for others, it provides a direct and honest introduction to the project and the way it was made.

Format & Specifications
